

BO Series Architectural Housings

Full height and handle version

CDVI Group Products

The CDVI series of pull handles provide a neat and secure installation of maglocks in a variety of environments, and provide a perfect option for fail safe locking, that is both secure and fits in with the door architecture.

Suitable for:

- Hospitals
- Secure wards
- Schools
- Housing associations
- Halls of residence
- Financial institutions

...and all instances where fail safe locking is required with a high level of security.

The more compact P300RP is installed at mid point and offers good security for less vulnerable doors.

P300RP

The full height BO600RP spreads the holding force vertically, ensuring maximum security without any leverage effect
